Blockchain

How can blockchain apply to you?

What is Bitcoin and other Cryptocurrencies?

What's the difference between Cannabis and Hemp?

1. Genetics
2. THC content and use
3. Cultivation (growing conditions)
4. Legal status

Pick your brain...

A decorative graphic consisting of two overlapping, horizontal, yellow ribbon-like shapes. The top shape is on the left and tapers to the right, while the bottom shape is on the right and tapers to the left, creating a central overlap.

What is the difference between THC and CBD?

Challenges in auditing

Cannabis:

- Inventory counts
- Cash counts
- Fair value of biologicals
- Legality of the business
- Are plant biological assets or inventory?
- Internal control issues – cash management

Challenges in auditing (cont'd...)

Cryptocurrencies :

- How do you verify ownership?
- How do you verify market price?
- What is the accounting classification?
- Regulatory oversight

Opportunities

- Cannabis market globally could become a trillion dollar industry
- Cannabis can support many other industries such as real estate, construction, technology, tourism
- Cryptocurrencies presents a very attractive way to conduct transactions by cutting out the middle person

Mining

- Some good stories, but not “All boats afloat”
- Major miners disposing of non-core assets
- Sector overall better

Other

- CPC's are back
